

IPDC Finance Ltd. is a company that offers financial services. It provides project, lease, supply chain, work order, mortgage, and equity financing, as well as syndicated finance for small and medium businesses and asset-backed securitization. Corporate, Small and Medium Enterprises, and Retail are the three business segments in which it works.

CHALLENGE

Scattered data collection to present accumulated report to management. In addition to various data presentation methods which was creating confusion at company level. Likewise, they were also facing realtime reporting challenges.

SOLUTION

We have developed a consolidate data mart and with real-time data availability by preparing insightful interactive dashboards using management approved formulas to maintain company level same insight sharing. The management now gets reports quicker before business hours starts. Likewise, they can check all the reports in their mobile devices while on the way to office.

RESULT

By developing this solution, the company's manual work reduced significantly by approximately 5 Days+ for every month. Therefore this helps them prioritize other opportunities.

CORE TECHNOLOGY USED:
