Factory has facilities of press shop, weld shop, paint shop, engine assembly conveyor, vehicle assembly conveyor, central quality control section, stores/OBL & research and development.

CHALLENGE

Users faced difficulty in inputting numerous invoices daily to the system manually which was monotonous and redundant work for them also causing input errors as well as being time consuming. As a result, lot of productive time was wasted.

SOLUTION

A bulk upload parameter was created to upload all the invoices in the system. Now users prepare a sheet according to the preset parameter and upload all the invoices at once which creates invoices automatically in the system.

RESULT

Monthly 5000-6000 invoices are uploaded
Manual work has been reduced
User saved an average of 4 hours daily from their work time which can be spent more productively.

CORE TECHNOLOGY USED:
